This is not a support group. Our goal is to address the isolation many Parkinson's Disease patients will encounter through discussions - sometimes with closure and sometimes without. Ninety minutes - 1:00 - 2:30 pm on the third Friday of every month. Join us and let's see what we can learn together." The last couple meeting have focused on what we expect out of our Movement Disorder Team and how we can work with them to improve the quality of care.

Pamela Durr, DPT Assistant Professor Bradley University, Department of Physical Therapy and Health Science.

Pam is also a coach with the local Rock Steady Boxing program. Sent me the following information concerning a research study they are conducting.

Please take five minutes of your time and help them with the study. The more participants they get the more accurate and meaningful the study becomes.

## **PPMI: The Study that Could Change Everything**

The Michael J. Fox Foundation launched PPMI in 2010 to better understand Parkinson's and advance new treatments. Since then, the study has changed how research is done and what scientists know about the brain. It is a cornerstone of our understanding of disease and has heavily influenced clinical trials.

PPMI follows people — with and without Parkinson's — over time to learn more about how disease starts and changes. That information may lead to insights and tools that can help better diagnose, treat and even prevent brain disease. The study shares its data set — the most robust in Parkinson's research — with scientists to speed breakthroughs.

This landmark initiative is only possible through partnerships. Leaders across the field and nearly 40 funding partners have helped shape PPMI. Most importantly, more than 1,400 participants enrolled in PPMI over its first decade. Many of those people continue in the study.

Today, with more therapies in testing, PPMI is expanding. The study has added an online platform to gather data from more than 100,000 people. It is following volunteers at more sites in more countries. More data can help advance us closer to better treatments and prevention.

Join the study that could change everything. <a href="https://bit.ly/32T2n1Q">https://bit.ly/32T2n1Q</a>

### Claudia sent me the following letter to pass on to the support group

Dear fellow members of the Central Illinois Parkinson's Support Group:

As you all know me, I am a PD patient and advocate for patient engagement and participation in Parkinson's disease research through The Michael J. Fox Foundation, and as such I would like to share with you the opportunity to effect change in the course of Parkinson's by participating in The Parkinson's Progression Markers Initiative - PPMI.

PPMI is the study that can change everything. The study is open to anyone over 18 - with or without Parkinson's. Parents, brothers and sisters, and adult children of people with Parkinson's aged 60 and up are especially needed. PPMI is on a mission to find better ways to measure, treat and potentially prevent Parkinson's.

Join @michaeljfoxorg as we advance #Parkinsons research through a new way to participate in the landmark Parkinson's Progression Markers Initiative, now online.

Thank you!
